SUMMARY

I work on the outbound side of marketing: writing the emails, keeping the CRM honest, and checking the data behind them. I started as an intern at a web agency in Noida in November 2024 and moved into a full-time executive role there seven months later. My degree is in pharmaceutical analysis and quality assurance, and it shows in how I work: I check a claim against the real page before I send it. Between jobs I build the small tools I need, including a Chrome extension that audits websites, a mailbox-rotation tracker and an Android app. I am looking for a digital marketing or business development role in Delhi NCR or remote.

EXPERIENCE

Independent Contractor, Employee Management System and Lead Generation Tool, Dev Enterprises — Jun 2026 – Jul 2026

- Delivered a custom employee management system and a lead generation tool for the client. I scoped what they needed with them directly, then coordinated tasks and timelines with the developers.

Data Research Executive, Sphinx Worldbiz Limited — Feb 2026 – May 2026

- Researched, collected and validated business data, and delivered clean datasets to the team.
- Set up the groundwork for an automated lead process for the European market. It connected Apollo, Sales Navigator, Google Sheets and a CRM, and took a lead from first discovery, through nurturing, to the point where a person could make the sales call.

Digital Marketing Executive, Avian Grove, Noida — Jun 2025 – Jan 2026

- Sent outbound email campaigns to 50+ prospective clients a month and got a 20% response rate.
- Managed the CRM: leads, follow-ups and conversions, so replies did not get lost.
- Wrote social content and handled SEO, which improved the agency's visibility on LinkedIn and Google Search.
- Did brand positioning work that contributed to a 15% rise in client engagement.

Digital Marketing Intern, Avian Grove, Noida — Nov 2024 – May 2025

- Set up the first CRM and client communication workflows, which I later scaled up as a full-time executive.
- Helped with campaigns, including Google Ads and Meta Ads, and coordinated content.

PROJECTS

Site Auditor (Chrome extension, JavaScript) — 2026

- Audits a website in one click: recognises 48 platforms and tools, checks security headers and SPF/DMARC records, and grades findings by type of business. Built with AI assistance and tested on real data.

Outreach Rotation Tracker (browser tool, JavaScript) — 2026

- Spreads a day's contacts across several company mailboxes in round-robin order, with a daily cap on each.

Android file and media converter (Kotlin, Jetpack Compose) — Jun 2026 – Present

- Converts images and PDFs entirely on the phone, with nothing uploaded. In development, not yet released.

Collaborator, MSc dissertation project (University of Surrey, School of Chemistry and Chemical Engineering) — 2026

- Wrote the Python code for a multi-objective optimisation and cost analysis of a continuous paracetamol process (NSGA-II with pymoo, DWSIM), and turned the results into documentation for a non-technical audience. Built with AI assistance.

SKILLS

Outreach and CRM	Email outreach, lead generation, HubSpot, Salesforce, Apollo, LinkedIn Sales Navigator, Google Sheets
Marketing	SEO, social media, email marketing, Google Ads, Meta Ads
Technical	Python, Kotlin and Jetpack Compose, JavaScript
Tools	Google Workspace, MS Office, Adobe Premiere Pro, Claude and ChatGPT (used with checking)
